

Methodological Note for the ToV declaration 2018

General Summary

In line with pharmaceutical industry practice, Proveca have declared their transfers of value (ToV) made to healthcare professionals, other relevant decision makers and health organisations in the Republic of Ireland for 2018. We have published this on our website along with this methodological note.

Methodology

All ToVs are documented and recorded by the finance department. At the end of 2018, we collected all this data from the finance department and found all the relevant transfers. The valuation was confirmed by checking the purchase orders. This has been collated and summarised in the declaration.

Currency

The transfers of value are all reported in Euros.

Timing of declaration

This declaration has been made in line with the expectations of IPHA, to publish the ToVs by the end of June 2019.

Date of declaration

June 2019
